

Introducing PASS Release 6.09

PASS Release 6.09 further enriches PASS functionality and improves the procurement process.

Here are the highlights:

User Profile

- The unlock account issue related to reset password is fixed.
- The analysis section now functions well as there was an initial impact due to the user conversion effort to maintain consistent user id's for all full time employees across the Peoplesoft and PASS databases.

PASS oAPT/oPIF

- When selecting an oAPT on the requisition, you may now search by Fiscal Year (FY) 2015, 2016 & 2017 in the drop down on the OCP oAPT form (Applicable to OCP Customer Agencies only)
- OAPT/OPIF # in the Requisition form drop down is now based on the requestor agency (Applicable to OCP Customer Agencies only)

Requisition

- Editing a fully approved Requisition will not prompt for an oPIF or an oAPT # any longer. (Applicable to OCP Customer Agencies only)
- When selecting an oAPT on the requisition, you may now search by Fiscal Year (FY) (Applicable to OCP Customer Agencies only)

Timesheets

- The ITSA PM role is a new role that is added to the approval work flow. This creates approval rerouting when a user tries to edit or make changes to the approved timesheets so as to ensure better monitoring.

Reports

- New timesheet report has been developed for the contractor timesheets. To access you must have the Create Services PO role.
