

## **Introducing PASS Release 5.9**

PASS Release 5.9 further enriches PASS functionality and improves the procurement process.

Here are the highlights:

### *Contracts Module*

An insurance compliance check has been added to the Contracts Module. An Office of Risk Management approval node will appear on the approval flow for IFB, RFI, and RFP contract types.

### *eSourcing Module*

Two new procurement methods have been added to eSourcing; Special Pilot Procurement and Competition Exemption. When a user selects one of these methods, the system will allow the user to select the vendor of their choice.
